April 21, 2010

Dear Simpson and Associates Environmental Contractors,

I would like to express my gratitude to you for the professional manner in which your company works. Over the past three years I have had the pleasure of working as Principal at two different school sites. Both of the schools are older and needed asbestos abatement. The abatement jobs at Pine View Middle School and Pasco Middle School were both conducted by your company. The abatement was executed with precise skill and a genuine concern for our students and staff. Your contracted workers on both jobs were professional in nature, always leaving the worksite clean and respecting the boundaries that we expect while working in areas with children.

In January 2010 I was very happy to learn that your company received the demolition bid for our two-story building at Pasco Middle School. The demolition was very quickly done and the timeline was very short. There was a point during the process that a wall needed to be torn down which was less than 100 feet from another building, although I felt safe that nothing would happen, I asked the crew to wait until my students and staff had left for the day to complete the tear down of that portion of the building. I know this put pressure on your workers, but your crew chief was more than willing to accommodate my request. This shows your company's dedication to the school and the community, not just the "job".

I appreciate your company and the values it instills in its employees.

Sincerely,

Kimberly Anderson,
Principal
Pasco Middle School
